Directions:

1. Determine the Patient's household size.
2. Move across maximum monthly incomes until you come to the highest income that is less than or equal to the client's income.
3. Discount the rates by the Discount \% in the dark green heading at the top of the column of the maximum monthly income less than or equal to the patient monthly income.
Example discount: Assessments are $\$ 397.25$. If the patient has a $90 \%$ discount the rate is discounted $-\$ 357.53$. The patient pays $\$ 39.72$
Please see the published fee schedule with sliding scale for the rate crosswalks.

## No Individual shall be denied services due to inability to pay.
